

SINTERED CARBON BLOCK Ag 0.5µm + UF MEMBRANE

Ultrafiltration antibacterial
for drinking water

Removes bad taste and
odours

Reduces chlorine

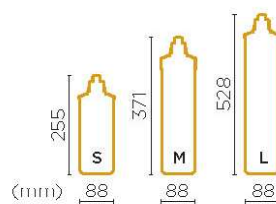

Features

- Disposable cartridges that adopt a dual filtration technology: 0,5µm Ag sintered Carbon Block combined with an UltraFiltration hollow fiber membrane < 0,1µm.
- The Carbon Block element ensures dechlorination and clarification of the water, removing suspended substances, chlorine, tastes and odors. The subsequent UF filter element allows an effective reduction of any bacteria.
- The Bayo version is equipped with a bayonet quick coupling.

ON25 BAYO

Code	Description	Max flow	Capacity
		l/min.	l
ON25S00	ON25 Small Sintered Carbon Block AG. 0,5µm+UF Bayo	2,5	5.500
ON25M00	ON25 Medium Sintered Carbon Block AG. 0,5µm+UF Bayo	4,5	11.000
